Objective

Passionate Web Developer with expertise in HTML, CSS , JavaScript, ReactJs Frontend and the MERN Stack. Seeking opportunities to utilize my skills in developing dynamic and interactive web applications.

SKILLS

- | | | |
|--------------|------------|--------------|
| • JAVASCRIPT | • REACT JS | • Express JS |
| • HTML/CSS | • MongoDB | • Node JS |

PROJECTS

Task Management App with JWT 📄 | [Reactjs](#), [ExpressJs](#), [Joi](#), [JWT](#), [MongoDB](#)

Mern App

- Implemented User registration, login, role-based authorization with Shadcn UI, hosted over netlify
- JWT-based authentication with refresh token support, Joi schema validation
- Developed a comprehensive task management application with key features including a scrum board, task addition form, and drag-and-drop functionality.
- JWT Structure: Header (token type signing algorithm), Payload (user claims), Signature (verifies integrity)
- Utilized MongoDB for backend storage to handle user data and tasks, enabling CRUD (Create, Read, Update, Delete) api axios operations.

BookLibrary 📄 | [React JS](#), [Tailwind CSS](#) , [MongoDb](#), [Axios](#)

BookLibrary

- Utilized MongoDB for storing user data, book details, Prices and for fetching API, hosted over vercel,render
- Used Tailwind DaisyUI , Context API , localStorage for Authorization
- Built a robust backend with Node.js and Express.js to handle authentication and user management.
- Developed login features for accessing premium books securely.

Cinema4U 📄 | [ReactJS](#) , [TailwindCSS](#) ,[Redux](#) , [Axios](#)

React-Redux App

- Develop the **front-end** of Movie app for Movie Lovers.
- Implemented Redux for efficient state management. .
- Integrated TMDB API for real-time movie data fetching and display.
- Streamlined data fetching for quick and accurate movie information display.

React-Firebase-auth 📄 | [Authorization with firebase](#)

React-firebase auth App

- Streamlined the user registration and login process, enhancing user experience.
- Demonstrated the ability to integrate third-party services and manage application state.
- A Simple auth firebase project with react
- Improved application security and data integrity using Firebase's authentication and database

TECHNICAL SKILLS

Languages: JavaScript, Html, Css, Basic Python, NodeJS, MongoDB

Technologies/Frameworks: React JS, Express JS, Tailwind CSS, Sass, BootStrap

Developer Tools: VS Code, Git , Github

CERTIFICATIONS

- Intermediate course of Javascript
- Python - Sololearn
- One year Diploma in computer applications

EXTRACURRICULAR

- Interested to read about latest new technology and apply them in Work
- Currently focusing on Development but target to have good command on DSA
- Other works: 🐙 [Github](#)
