## OBJECTIVE

As a dedicated software developer with a interest in React JS and the MERN stack (MongoDB, Express.js, React, Node.js), I am eager to leverage my skills to contribute to innovative projects. I am seeking a challenging position that allows me to grow as a developer while delivering high-quality, user-friendly web applications.

The boilerplate content was inspired by Gayle McDowell.

## COURSEWORK / SKILLS

- HTML CSS
- JAVASCRIPT
- OOPS Concept
- NODE JS
- PYTHON
- DBMS(MongoDb,SQL)
- REACT JS

## PROJECTS

### **Shop4u-Ecommerce webapp** [↗](#) | ReactJs, Redux-Thunk,Payment-Gateway Jan 2025

- Developed a functional e-commerce web application that allows users to browse and purchase products seamlessly with payment gateway.
- Implemented a secure payment gateway using Razorpay to handle transactions efficiently after selecting product from navigation.
- Deployed the application on cloud platforms, ensuring scalability and reliability.

### **BookLibrary** [↗](#) | ReactJs, TailWind Css, Axios Jan 2025

- Used Tailwind DaisyUI , Context API , localStorage for Authorization
- Built a robust backend with Node.js and Express.js to handle authentication and user management.
- Developed login and signfeatures for accessing premium books securely.

### **CINEMA4U** [↗](#) | React, JavaScript, Redux,Axios IDE - VS Code 2025

- Developed a dynamic web application that provides users with news, ratings, and reviews of the latest and classic films .
- Implemented state management using Redux for efficient handling of application state and data flow.
- Utilized Axios to fetch movie data from the TMDB API, ensuring real-time updates and a seamless user experience.

### **TaskManagement App - with JWT Auth** [↗](#) | HTML, CSS, React, MongoDB 2024

- Implemented User registration, login, role-based authorization with Shadcn UI, hosted over netlify.
- JWT-based authentication with refresh token support, Joi schema validation.
- Developed a comprehensive task management application with key features including a scrum board, task addition form, and drag-and-drop functionality.
- JWT Structure: Header (token type signing algorithm), Payload (user claims), Signature (verifies integrity)
- Utilized MongoDB for backend storage to handle user data and tasks, enabling CRUD (Create, Read, Update,Delete) api axios operations.

## TECHNICAL SKILLS

**Languages:** Basic Python, JavaScript, SQL,

**Technologies/Frameworks:** HTML5, CSS3, React, MongoDB, Express, Javascript, Bootstrap, Tailwind Css

**Developer Tools:** VS Code, Node Js, express JS

## CERTIFICATIONS

- Python - Sololearn
- Javascript- Sololearn
- 1 year Diploma in Computer Applicaion

## EXTRACURRICULAR

- Interested to read about latest new technology and apply them in Work
- Currently focusing on Development but also use to learn AI for more productivity
- check my work on [🐙 Github](#)
